SOME ANIMALS DRAWN WITH CIRCLES SQUARES *and* TRIANGLES

Here are a few examples of how to draw animal pictures, using only circles, squares and triangles. After you copy these, see how many other animals you can draw this way.

LET'S DRAW/ OUR DOG-!

1.

2.

3.

It is easy to draw a dog's head if you follow these simple instructions. Make a large circle with your compass, and then draw a vertical diameter line. Using the base of your diameter line as the center, and with your compass, draw a smaller circle to intersect the larger one. Now insert very small circles for the eyes and the nose. Draw a pair of triangles for the ears, and a curved line for the mouth. Now draw over the dotted lines with your dark pencil.

-and SOME OTHER DOGS

Illustrated above, are four easy steps for drawing a dog. Also illustrated in the dotted lines, is a dog in the motion of running. Draw over the dotted lines. It is good practice.

A CAT IS LIKE THIS

It is easy to draw a cat if you follow these simple step by step illustrations. Note that the cat's head may be drawn from a single circle.

A RABBIT

Here are some step by step illustrations.

A DUCK *and* A FISH ~

A CAMEL *on the* DESERT

To draw a camel, first draw a small egg shaped ellipse and a larger egg shaped ellipse. Be sure you allow sufficient room between them to draw in the curved neck. Then add two small triangles on his back to represent the humps, draw his long legs, and you have a camel. Now practice going over the dotted lines with your dark pencil.

WE DRAW A HORSE-

By plotting a graph over any picture, you can learn to draw any animal merely by carefully copying the content of each square that has any lines in it.

AND NOW A COW!

Do the same with this picture of a cow, making the squares as large as desired. Then draw over the dotted line picture with your dark pencil.

AND LAST-
A BIRD!

"STEP-BY-STEP"

Here are some simple
step by step illustrations
on how to draw a bird.
Practice going over the
dotted lines with your
very black pencil.
